

ADVANCING GENE AND CELL THERAPIES IN SOUTH AFRICA

June 29, 2021 | 3 - 6:25 p.m. SAST

Free Virtual Conference | Register: ASGCT.org/SouthAfrica

Chairs

Johnny Mahlangu, BSc, MB BCh, MMed, FCPATH
University of the Witwatersrand and National Health Laboratory Service

Kenneth Cornetta, M.D.
Indiana University
Chair, Global Outreach Committee, ASGCT

Developing Gene Therapy Clinical Trials for **Monogenic Diseases**

Johnny Mahlangu, BSc, MB BCh, MMed, FCPATH
University of the Witwatersrand and National Health Laboratory Service
Gene Transfer for Genetic Diseases

David Williams, MD
Boston Children's Hospital
BCL11A as a Molecular Target for Treatment of Sickle Cell Disease

Cell Therapies

David Brittain, MBChB FC Path
Albert Alberts Stem Cell Transplant Centre
Getting Cell Therapy for Leukemia and Lymphoma Into Clinical Trials in South Africa: Challenges and Opportunities

Marcela V. Maus, MD, PhD
Massachusetts General Hospital
Considerations for Developing Genetically Modified T-Cell Therapy Trials

Paul Ruff, MB BCh, MMed
Department of Medicine, University of Witwatersrand Faculty of Health Sciences
Health Product Regulation in South Africa

Adora Ndu, PharmD, JD
BioMarin Pharmaceutical
Regulatory Considerations for Gene Therapy Trials in South Africa

Presented by the American Society of Gene & Cell Therapy in collaboration with
